

## COULD YOU BE OUR NEXT EMPLOYEE

Working at the forefront of open data in the UK, we help our clients manage, publish and gain insight from data in a wide range of domains, often with a positive benefit for society. Right now, we're expanding and looking to hire people with great skills in a number of chosen areas.

### WHO WE'RE LOOKING FOR

#### BUSINESS ANALYSIS

Helping bring order, working with us to figure out how client systems and internal processes would work most effectively

#### USER RESEARCH

Looking at things from the user's side, discovering what is needed from a service through workshops and interviews

#### BUSINESS DEVELOPMENT

Help grow the business by finding new client leads, networking and developing high-level strategies for future improvement

#### MARKETING

Interacting with the data community and getting our name out there through digital and print mediums

#### UX DESIGN

Less of a coder but with a keen eye for making functional systems more eye-catching? UX Design might be of interest to you

### INTERN PROGRAMME

- We also run an intern programme once a year.
- We've two or three spaces for interns with enthusiasm for emerging technologies to come and work with us to gain experience from a company at the forefront of data-graph and linked data technologies.
- We support interns on both the tech and business sides.
- The positions last for three months over summer, and you get a salary and paid holiday.

### WHAT TO EXPECT

You'll get 25 days holiday + bank holidays, a great pension scheme, a budget for laptop and time to attend conferences of your choosing with discretionary travel assistance

You can opt into our EMI share scheme - all shareholders are employees

We offer flexible working terms. Many people work from home on Friday and at the discretion of your manager, we're flexible the rest of the time so life commitments won't be a problem

## Portishead, Bristol

An attractive coastal town with an independent high street and marina just a stone's throw away

### WORKING AT

# EPIMORPHICS

We're community minded. We care about what our employees think and want them to have a say in what we do and how we do it. We've worked with both public and private companies to build ground-breaking linked data services which have a positive benefit on society.

Our team comprises accomplished computer scientists who helped define the standards for the Semantic Web and Linked Data. Between us we form an eclectic bunch of people who love to solve interesting challenges, big and small.

### SOME HISTORY

- 100% employee owned company
- Client focused projects
- R&D product based development

### WE WORK WITH

#### GETTING HERE

From Bristol Bus Station you can be here in 40 minutes by catching the X3 and getting off at Sainsbury's. Or if you've got a podcast you want to finish, take the X4 for a more scenic route around the houses and be here in an hour

It's about an hour cycle from Bristol, but when you get here we have secure bike storage and tea, coffee and biscuits on tap

If public transport and cycling aren't your thing, we've got a small onsite car park and plenty of free on-road parking making it easy to commute from further away
